

WHICH ADDITIVE IS RIGHT FOR ME?

Not sure which additive is right for your equipment? Good news! You don't need to be an expert. That's what we're here for.

Water In Your Tank?

Did you know water is the #1 Diesel Fuel Contaminant? To prevent & treat water in your tank, you need >>

Prevent & Protect

Protect what matters to you most by keeping your fuel clean so your equipment stays where it belongs: on the road.

Need a Boost?

Is your equipment slow to start? Sluggish engine? You need a cetane kick >>

Winter Ready?

Prevent gelling & plugged fuel lines before a stalled engine strikes.

Gelled Up?

You're gelled & need to get moving! D-GEL to the rescue!

Got Bugs?

Stop bacteria & fungi from taking over your tank!

Storing Fuel?

Prolong fuel life >>

WATER EMULSIFIER

Encapsulates water & fuel to create a harmless, combustible mixture

WATER DEMULSIFIER

Drops water to the bottom of tank for water separator removal

DETERGENT

Cleans fuel system & improves power & fuel economy

LUBRICANT

Reduces fuel system friction & premature failure of components

CORROSION INHIBITOR

Prevents corrosions of fuel system components

CETANE IMPROVER

Improves power, cold starts, & reduces exhaust emissions

ANTI-GEL

Prevents fuel gelling that plugs fuel lines & filters

ANTI-ICER

Prevents fuel icing that plugs fuel lines & filters

EMERGENCY

Reliquifies gelled & iced fuel filters //contains alcohol

BIOCIDE

Kills microbial slime that plugs fuel lines & filters

STABILIZER

Prolongs the life of stored fuel & slows fuel degradation

Additives that contain alcohol should be avoided except in emergencies.
